

of the world. The world is not a mere collection of objects, but a complex, interconnected system of relationships and meanings. This view of the world is central to the philosophy of education, as it shapes our understanding of the role of education in society and the individual.

Education is not merely a process of transmitting knowledge and skills, but a process of shaping the individual's character and values. It is a process of helping the individual to understand the world and to act in a responsible and ethical manner. This view of education is central to the philosophy of education, as it shapes our understanding of the role of education in society and the individual.

The philosophy of education is a branch of philosophy that deals with the nature and purpose of education. It is a branch of philosophy that is concerned with the relationship between education and the other branches of philosophy, such as metaphysics, epistemology, and ethics. The philosophy of education is a branch of philosophy that is concerned with the relationship between education and the other branches of philosophy, such as metaphysics, epistemology, and ethics.

The philosophy of education is a branch of philosophy that is concerned with the relationship between education and the other branches of philosophy, such as metaphysics, epistemology, and ethics.
